# Using resource-centric

1. Here is a Start Event.

2. Move the cursor on top the Start Event. You will see a set of resource icons showing around the Start Event.
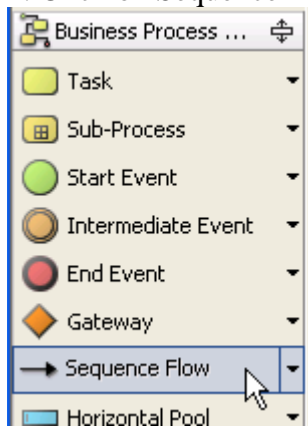

3. Press on the resource 'Sequence Flow -> Task'

4. Drag…

5. Release the mouse button. A task is created and connected with the Start Event with a Sequence Flow.
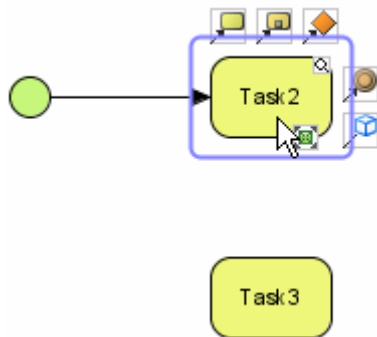

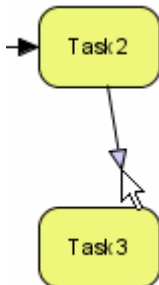

Using the pallet

1. Click on Sequence Flow from the diagram pallet.

2. Press on the source shape (e.g. a Task)

3. Drag to the target shape.

4. Release the mouse button on the target shape.

Task2

Task3

5. A connector is created to link up the source and target shape.
